

# WATERLOO HYDRO HEADQUARTERS

Waterloo | Ontario

## THE CHALLENGE

The Waterloo Hydro Headquarters is a 140,000 square foot two story building. The challenge was that the equipment was new to the Ontario market. The client was sold on better zone control, efficiency, reduced maintenance, and operating costs.

## THE SOLUTION

City Multi units were chosen because they are easy to install, have competitive pricing, and great distributor support. Further the units do not cause bulk heads as they are not large pieces of equipment. Outdoor units include: 8 x PQRV-P120, 1 x PQHY-P96, and 1 x PUHY-P120. Indoor units include: 60 x PLFY-P08, 12 x PEFY-P12, and 10 x PEFY-P24. Controls include AG-150 and PAC-SE51CRA. Other products include Renewaire.
