

# TRANSLINK BUILDING

Vancouver | British Columbia

## THE CHALLENGE

The Translink Building High rise building is a 135,000 square foot office and mixed used facility (600 tons).

## THE SOLUTION

Six PWFY-P36 were installed. The modules generate domestic hot water securing \$60,000 in rebates from British Columbia (BC) Hydro. General features of the units include the following: R410A refrigerant, ducted fancoil supporting multiple configurations and flexible installation, and quiet operation from 26 to 45 dB(A).
