SEPTEMBER 2021

TRAIN WITH MITSAIR THIS FALL SEASON!

The fall season is upon us and that means it is time to focus on training! At Mits Airconditioning Inc., we strongly believe in training. We offer sessions to ensure that our products are used in the most effective and efficient ways possible. There is extraordinary value in having our team of engineers and experts, along with our partners, communicate with our customers on all aspects of our products. We currently offer a variety of comprehensive webinars so that we can train our customers face to face even if not in person. **In late October, we are excited to announce that Mitsair will be hosting in person trainings at our Mississauga facility on Navien products (in accordance with Health Canada guidelines).**

Alternately, if you would like to complete a training at your own pace we also offer online training modules where you will be awarded with a certificate of completion once you pass the quiz at the end of the module.

PLEASE VISIT [MITSAIR.COM/TRAINING-REGISTRATION/](https://mitsair.com/training-registration/) FOR THE UPDATED TRAINING SCHEDULE

MITSUBISHI ELECTRIC HEATING AND COOLING CURRENT EVENTS AND HAPPENINGS

CANADA GREENER HOMES GRANT

The Canada Greener Homes Grant provides funds for home evaluations and retrofits. Primarily, it outlines rebates available on various Mitsubishi Electric Heating and Cooling models. Participants are eligible for up to \$5,600* total (*conditions apply) under the initiative which includes refund of the audit fee (up to \$600). Please contact info@mitsair.com for more information on the program and how to apply.

COMING SOON! MITSUBISHI ELECTRIC HEATING AND COOLING QAHV AIR SOURCE HEAT PUMPS PRIMARILY DESIGNED TO PRODUCE HOT WATER

The Mitsubishi Electric Heating and Cooling QAHV has been specifically designed to produce high volume hot water and is suitable for commercial and industrial applications where hot water demand is high. By adopting Mitsubishi Electric's unique technology, QAHV can ensure highly reliable performance as well as high heating capacity even at low outdoor temperatures.

HIGH PERFORMANCE | HIGH EFFICIENCY | ENVIRONMENTALLY FRIENDLY
